Work Experience

Dell Technologies (Chennai/Bengaluru, India)

- Software Principal Engineer : 04/2025 - Present *
- Software Senior Engineer : 07/2022 - 03/2025
- Software Engineer 2 : 04/2021 - 06/2022
- Software Engineer 1 : 07/2018 - 03/2021
- Intern : 01/2018 - 06/2018

Superfect Solutions (Coimbatore, India)

- Industrial Intern : 06/2017 - 06/2017

Skills

AI/ML - GenAI, LLM, RAG, OpenAI SDK, LangChain, Vector Databases, Embeddings, Agentic AI, MCP Client & Server development.				Vibe Coding
JavaScript/TypeScript	Node.js/Express.js	Python	Java	Node.js/Express.js
Spring MVC	REST API	GraphQL	SQL/NoSQL	Serverless (FaaS)
Microservices	Kafka	PWA	Electron.js	HTML & CSS

Projects

Dell Wyse Management Suite: management solution to centrally configure, monitor, manage, and optimize Dell Hybrid Client powered endpoints and Dell thin clients. (Java, Spring, MongoDB, MySQL).

Dell Device Management Console enables IT admins to centrally manage and configure Dell Pro Smart Docks, peripherals, and monitors.

Intel vPro® Provisioning for Dell Devices enables IT admins to securely onboard Intel vPro enabled devices for remote management. (Java, Spring, Node.js, TypeScript, MongoDB, MySQL).

The solution also manages Connected PCs and provides WWAN based out-of-band below-the-OS telemetry and management designed as a defensive capability providing Remote Locate/Lock/Wipe.

Dell Apex Managed Device Service: aaS solution to provide managed IT. (Node.js, Cosmos DB, Azure Serverless, Java, Spring, MongoDB, MySQL)

- Led the development of a new microservice utilizing Azure serverless functions with Node.js, TypeScript & Cosmos DB.
- Ensured code quality and consistency by integrating ESLint and Prettier into the repo.
- Developed and integrated new REST APIs using both Node.js and Java Spring for the backend service.

Dell Hybrid Client - Cloud-aggregated File Explorer: (Node.js, Express, Electron, SQLite, Sequelize, Server-Sent Events, and REST API)

- Led the efforts for a modular integration of cloud storages into a file explorer.

Dell Hybrid Client - Azure Virtual Desktop Linux Remote Desktop Client: (Electron.js, Express.js, SQLite, Sequelize, REST API)

- Developed a cross-platform application to list, connect, and work with Azure Virtual Desktop and App sessions.

Education

- B.Tech in Information Technology, (07/2014 - 04/2018), Vellore Institute of Technology, Vellore, Tamil Nadu, India. CGPA: 8.92/10.

Achievements

- Dell Client Solutions Hackathon & Avishkaar (An innovation competition): Participated every year and won awards globally & regionally.
- Dell GenNext Game Changers - 2024 Global Innovation Competition - Semi-finalists.
- Dell Inspire Recognition: Received every year from 2018 to 2024.
- Admission to the B.Tech IT program under the STARS Scheme at Vellore Institute of Technology.

Patents - (4 Granted*, 3 Filed) in USPTO

1. Conferencing solutions for multi-monitor aware immersive collaboration experience: US 18/783490 (07/2024).
2. Managing Desktops at an Information Handling System: US 18/769876 (07/2024).
3. Managing Progressive Web Applications: US 18/671717 (05/2024).
4. Context-Based Intelligent Placement of Files in Aggregated Cloud Storage: US 18/164670 (02/2023) – 9/17/2024 -12,093,224*.
5. Intelligently Associating a File with an Application: US 18/049520 (10/2022) - 3/12/2024 - 11,928,079*.
6. Logging in to Modern Workspaces Using Different Cloud Identity Providers and Single Sign-On: US 18/047971 (10/2022) - 3/11/2025 - 12,250,211*.
7. Providing Access to Functionality of a Web Application via Microapps: US 18/047975 (10/2022) - 5/16/2023 - 11,652,871*.

Personal Projects

- node-clipboard-event (npm package): Clipboard change event for Node.js/Electron.js/NW.js - npmjs.com/package/clipboard-event
- node-detect-usb (npm package): Detect USB and get mount points/paths - npmjs.com/package/detect-usb
